Florida DOT Heliport Documentation Requirements

The following is an example of what a heliport proponent submitting to the Florida DOT for the construction of a heliport in the state can expect to be required to provide to the state DOT in their submission process in accordance with Florida Statute Section 330.30(1), FS, and Rule 14-60.005, FAC:

- **Five-Alpha To Provide**
- **Owners To Provide**

Rule 14-60.005(5)(a), FAC Property Rights. Provide a copy of written legal confirmation of ownership, option to buy, or lease agreement for the real property that comprises the site on which the proposed airport would be located. Although adequate safety areas surrounding an airport site are important and a factor in the Department's approval determination, the applicant is not required to hold property rights over those real property areas that would constitute runway approach surfaces.

Rule 14-60.005(5)(b), FAC Facility Diagram. Provide a scale drawing showing the size and dimensions of the proposed facility; property rights of way and easements; lighting, power, and telephone poles; location of building(s) on property and surrounding areas; and direction, distance, and height of all structures over 25 feet within 1,000 feet of the site perimeter.

Rule 14-60.005(5)(c), FAC Geodetic Position. Provide a copy of a U.S. Geological Survey quadrangle map or equivalent with the proposed site plotted to the nearest second of latitude and longitude.

(d) Location Map. Provide a copy of a map or sketch, at least 8.5 x 11 inches in size, showing the location of the proposed site, with respect to recognizable landmarks and access roads to the site clearly marked.

Rule 14-60.005(5)(e), FAC Aviation Facilities. Provide a list of names and mailing addresses for adjacent airports, including a sample copy of the letter submitted as proposal notification to these airports, and attach a copy of all airport reply correspondence.

1. For a proposed airport or seaplane landing facility, list all VFR airports and heliports within five nautical miles and all IFR airports within 20 nautical miles.
2. For a proposed heliport, list all VFR airports and heliports within three nautical miles and all IFR airports within 10 nautical miles.

Rule 14-60.005(5)(f), FAC Local Government. Provide a copy of each of the letters of notification, showing the recipient's name and mailing address, that have been submitted to each zoning authority having jurisdiction, for the municipality and county in which the site lies or which is located within five nautical miles of the proposed airport site. The applicant shall also include a copy of all related correspondence from each city or county authority, including a statement that the proposed airport site is in compliance with local zoning requirements or that such requirements are not applicable.

Rule 14-60.005(5)(g), FAC Adjacent Property. Provide a list of the names and mailing addresses of all real property owners within 1,000 feet of the airport site perimeter, or within 300 feet of the heliport or helistop site perimeter, including a single copy of the letter of notification submitted as notification to these adjacent real property owners, and include a copy of all real property owner correspondence in reply. If notification was provided by a local government as part of its review and approval process for the airport, provide written confirmation of the fact, in lieu of the above required submittal by the applicant.

Rule 14-60.005(5)(h), FAC Public Notice. Provide a copy of the notice and of the letter, showing the recipient's name and mailing address, requesting publication of notification of the proposed airport site in a newspaper of general circulation in the county in which the proposed airport site is located and counties within five nautical miles of the proposed airport site. If this condition has been accomplished by a local government as part of its review and approval process for the airport, provide written confirmation of the fact, in lieu of the above required submittal by the applicant.

Rule 14-60.005(5)(i), FAC Waste Sites. Provide written confirmation that the runway(s) on the proposed airport would not be located within 5,000 feet of any solid waste management facility for a proposed airport serving only non-turbine aircraft, or within 10,000 feet of any solid waste management facility for a proposed airport serving turbine-driven aircraft.

Rule 14-60.005(5)(j), FAC Air Traffic Pattern. Provide written confirmation, including a graphical depiction, demonstrating that safe air traffic patterns can be established for the proposed airport with all existing and approved airport sites within three miles of the proposed airport site. Provide a copy of written memorandum(s) of understanding or letter(s) of agreement, signed by each respective party, regarding air traffic pattern separation procedures between the parties representing the proposed airport and any existing airport(s) or approved airport site(s) located within three miles of the proposed site.

Rule 14-60.005(5)(k), FAC Safety Factors. Provide written confirmation that the runway and taxiway design criteria and airport design layout of the proposed airport have appropriately taken into account consideration of the manufacturer's performance characteristics for the type(s) of aircraft planned to be operated; the frequency and type(s) of flight operations to be anticipated; planned aviation-related or non-aviation activities on the airport; and any other safety considerations, as necessary, to help ensure the general public health, safety, and welfare of persons located on or near the airport.

Rule 14-60.005(5)(l), FAC Security Factors. Provide written confirmation that the proposed airport site owner or lessee will take appropriate steps to help protect the general public health, safety, and welfare through secure airport operations and that they will develop and implement adequate airport security measures to safeguard airport and aviation-related assets from misappropriation or misuse in order to prevent potential loss or public endangerment.

Rule 14-60.005(5)(m), FAC FAA Approval. Provide a copy of the notification to the FAA regarding the proposed airport site and a copy of the FAA's airspace approval correspondence given in response.

Along with your submission of the documents requested above, please include answers to the following questions as well as the additional documentation requested below.

1. Is the TLOF elevated?
2. Is the FATO elevated?
3. Is the FATO contiguous with the TLOF and load bearing?
4. Is the safety area elevated and if so by how many feet?
5. What are the dimensions of the TLOF?
6. What are the dimensions of the FATO?
7. What are the dimensions of the safety area?
8. What is the make and model of the aircraft that will be operating from the helipad?
9. Will the helipad be marked using the standard "H", as per the FAA marking guidelines?
10. Will the TLOF be marked, as per the FAA marking guidelines?
11. Will the FATO be marked, as per the FAA marking guidelines?
12. Has the helipad already been built?

Please ensure you include the following documents:

- Document showing that the plans as submitted meet building code requirements.
- Document showing that a helipad at this location is a compatible land use.
- Or a stamped set of plans.
- 4k approach/departure paths showing all objects with their height and distance from the FATO.
